Creators

Naoko Takeuchi (Author, Illustrator)

Naoko Takeuchi is the creator of numerous successful manga series for teenage girls; most notably the globally-renowned *Pretty Soldier Sailor Moon* and its prequel series, *Codename: Sailor V*. As a manga artist, she both authors and illustrates all her works. She has won numerous awards, and *Sailor Moon* is considered the archetype of the “magical girl” character and genre. Nonetheless, Takeuchi has frequently discussed the publisher and editorial interference in the *Sailor Moon* manga, and criticised the 1990s anime adaptation for having “a slight male perspective” due to the mostly-male creator team, compared to her manga which was “written by a girl (me) for girls...” (quoted in MTV). She originally trained to be a licensed pharmacist at Kyoritsu University of Pharmacy and graduated with a degree in chemistry. Takeuchi is also a songwriter under the pen name “Sumire Shirobara”, and has written many songs to accompany various *Sailor Moon* adaptations.

Summary

Pretty Soldier Sailor Moon follows 14-year-old Usagi Tsukino, a klutz and crybaby who receives the power to transform into a magical warrior named Sailor Moon, Soldier of Love and Justice. Transforming not only changes her clothes, but grants her access to supernatural powers to fight enemies. The story is set in Tokyo, Japan. There are five primary arcs to the series, plus several short stories that accompany the core narrative. The arcs reflect the primary antagonists and themes the protagonists face in those chapters. The five story arcs are: [The Dark Kingdom Arc](#), [The Black Moon Arc](#), [The Infinity Arc](#), The Dream Arc, and [The Stars Arc](#). This entry focuses on the Dream Arc. The series draws extensively from Classical mythologies, as well as fairytales and other folktales.

Dream Arc (Volume 8, Volume 9, Volume 10):

During a solar eclipse, a flying ship emerges from the sun claiming the Dead Moon Circus has arrived; and Usagi and Chibiusa see a Pegasus. That night, as the enemies Zirconia and the Amazoness Quartet create a barrier sealing all of Tokyo in an enchanted dome, Chibiusa is visited by Pegasus who begs for her help to save "Elysion". The next day, Mamoru is hospitalised due to strange pains in his chest, and the Dead Moon Circus launches multiple attacks—and some circus-like pranks—on the Sailor Soldiers. Usagi and Chibiusa are targeted first, followed by Ami, Rei, and Makoto, whose power is increased as they defeat the creatures sent to destroy them. Minako knowingly walks into a trap alone, aiming to build her powers, however she is unable to fight back. Meanwhile, Michiru, Haruka, and Setsuna have been raising Hotaru, who has rapidly grown into a young girl. That night, Sailor Saturn appears to Hotaru in her dreams, restores her old memories, and ages Hotaru up to her former age. Hotaru informs Michiru, Haruka, and Setsuna that it is time for them to return and fight alongside Sailor Moon. Back in Tokyo, Minako is finally able to free herself from the trap, unlock her powers with Artemis' help, and defeat those enemies.

Despite having caught the same illness as Mamoru, Usagi battles Zirconia along with the other Sailor Soldiers. Sailor Saturn arrives and confronts the Amazoness Quartet, revealing they are being controlled by Zirconia and her mistress Nehellenia; but when they disavow the Dead Moon Circus, Zirconia captures the Quartet, Sailor Saturn, and Sailor Chibimoon. Usagi and Mamoru are rescued by Pegasus, and awaken in Elysion, once the capital of the Golden Kingdom of Earth, which is located deep in the heart of the planet. They speak to Pegasus

in his humanoid form, as the priest Helios, and learn of the threat posed to earth. After another battle on the earth's surface, the Sailor Soldiers board the Dead Moon Circus' ship to confront Nehellenia.

On the ship, Nehellenia reveals the origin of her grudge against Sailor Moon and the Sailor Soldiers. It began because she was not invited to the birth of Princess Serenity in the Silver Millennium. In her offense, she had cursed the princess to not live to ascend to the throne—a curse that ultimately came true when the Moon Kingdom fell. Queen Serenity had sealed Nehellenia away into a mirror in return. As the Sailor Soldiers channel their power from their past lives, they create the Holy Moon Chalice; and drinking from this allows Usagi to evolve into Eternal Sailor Moon. She banishes Nehellenia and heals the earth. She also purifies the stones the Amazoness Quartet were trapped in, and it is revealed that when Chibiusa becomes a true sailor soldier in the 30th Century, they will awaken to fight by her side as her Sailor Soldiers. Helios thanks them for saving Elysion.

Analysis

Pretty Soldier Sailor Moon draws on Greek and Roman mythology, Japanese folklore and traditions, and fairytales to establish its worldbuilding. The series has a strong focus on the theme that peace and happiness are always worth fighting for, even though they can never be permanent, because hardship is part of human existence.

The Dream Arc provides further revelations about the characters' pasts, triggered by the attacks of Queen Nehellenia and the Dead Moon Circus, which deepen the worldbuilding. During the past and the time of the Moon Kingdom, the capital of the Golden Kingdom of Earth was Elysion, located at the heart of the planet. "Elysion" itself is phonetically similar to both the word "illusion", and Elysium or the Elysian Fields from Greek mythology, the home of those destined for a happy afterlife. However, it is not associated with death within the series, but rather sanctuary. The architecture in Elysion is similar to that of the Moon Kingdom, in that it resembles structures like the Parthenon. However, in the present, Elysion has fallen into disrepair, due to time and the attacks of the Dead Moon Circus. At the conclusion of the Dream Arc, Elysion is restored to its former glory. Elysion's priest is a man young in appearance, but actually many thousands of years old, named Helios. His name references the personification of the sun in Greek myths. He can take the form of a white Pegasus with a horn

like a unicorn as needed. In his human form, the horn remains on his forehead, and he is depicted in all white. Helios tends to the shrine in Elysion along with two unnamed shrine maidens he calls Maenads. In Greek myths, Maenads were followers of the God of wine, Dionysus and were known for frenzied, wild behaviour. However, when introduced, the Maenads in the series are frozen in crystals due to the attacks on Elysion. They are depicted with long flowing hair and dresses, and appear tranquil while frozen, suggesting a very different characterisation from the Greek myth.

During a flashback in the Dream Arc, it is revealed that the Moon Kingdom's fall, explored initially in the Dark Kingdom Arc, was actually brought about by a curse from Queen Nehellenia. She is a dark magic user who was not invited to the birth of Princess Serenity – a premise which echoes that of the fairytale of Sleeping Beauty, in which the 13th fairy uninvited to the princess's birthday cursed her to die before adulthood, but the good fairies altered the curse to cause her to fall asleep. Similarly, Princess Serenity was cursed to never ascend to the throne. In the Silver Millennium, it was the brainwashed people of the Golden Kingdom of Earth who attacked the Moon Kingdom, causing the deaths of Prince Endymion and Princess Serenity and the kingdom's fall. The myth of Selene and Endymion (discussed in the [Dark Kingdom Arc entry](#)) is therefore integrated with this fairytale and the myth of the Elysian Fields, deepening the worldbuilding by drawing on multiple stories.
