Additional information

Summary

Helping Hercules tells the story of a young girl named Susan who does not want to help or do chores at home. She finds a magic coin that takes her back to Ancient Greece where she becomes entangled in scenarios from Greek mythology – she has to help Hercules clean out Augean stables, help Orpheus get Eurydice back from Hades, help Paris choose between the goddesses, help Bellerophon capture Pegasus to find the chimera, fight Medusa, deal with Midas, and help Hercules get the apples from the Garden of Hesperides.

Analysis

Helping Hercules is a book with eight chapters, each one depicting a situation that causes Susan discomfort – she is forced to do chores, is not chosen as the lead of the play, she does not play her instrument well. In each scenario, Susan wishes for an escape. Salvation comes to her in the form of a coin which acts as a time-travelling device, magically whisking Susan away from all her problems. There is a long-standing tradition of using time-travel to transport children back in time to teach them lessons or create amusing scenarios. *Helping Hercules* does both. Though Susan may think she escapes a troublesome situation back home, she finds herself in a more difficult one whenever she travels back to Ancient Greece. In each scenario, though the narrative is infused with a contemporary feel and lots of humor, Susan learns a particular lesson. When she doesn't want to do her chores, she ends up having to help Hercules clean the stables. When she encounters Midas and is turned to gold, she learns to be careful what she wishes for, and while she constantly gets upset that she gets no credit for the help she gave in Ancient Greece, by the end of the book she is the one saying "thank you" to the characters of the past.

The illustrations are black and white sketches on random pages and are reminiscent of Roald Dahl, aiding the contemporary feel of the story.

The author includes a pronunciation guide at the end of the book.
