Additional information

Summary

The novel unfolds the love story of Psyche and Cupid. The story is mainly narrated from Psyche's point of view, with her being the main narrator. However, we also read about the actions of Cupid and the other gods from the all-knowing narrator (parts that Psyche did not know about and therefore could not narrate in her own voice). This is a retelling of Apuleius' tale from his *Metamorphoses* (*The Golden Ass*).

Analysis

The novel highlights Psyche's perspective on the story and portrays the challenges she had to overcome. She is not a passive character but a true active heroine who errs and then learns from her mistakes and fights to correct them. The story, albeit the ancient setting, is modern in its perception of gender. In the original tale by Apuleius, Psyche was quite passive most of the time, we certainly did not hear her voice and her side of the story. Yet in the modern retelling Psyche takes center stage and is being portrayed as a round character, with thoughts and decisions of her own. The story conveys her feelings since her youth and her misgivings, her loneliness and her yearning for some kind of happiness and love. Narrating the events from Psyche's point of view, rather than in the manner of an omnipresent narrator, creates closeness between the reader and the mythical heroine. A bond is created and the reader identifies with Psyche who undergoes regret and suffering before finally achieving the happy ending she deserves. This technique involves the reader in the mythological tale and makes the events seem closer and believable.

Furthermore, Psyche is a young woman who finds the strength in herself to fight her surrounding and the gods. She was always lonely as a child and her relationship with Amor gives her the happiness she always wished for. This gives the story an element of empowerment for young female readers, but also provides a universal message of hope for all readers, showing that situations can improve and that even if someone was lonely as a child, friendship and happiness can still be found later in life. Psyche is not presented as a larger-than-life character, but as a regular human being (apart from her extraordinary beauty) and therefore it is easier for the readers to identify with her. She does not overcome her hardships by using super human powers of any sorts, but rather by using her brains and by showing her good and kind nature (in contrast with goddess Venus who is harsh and even

cruel).
