### Filippos Mandilaras , b. 1965 (Author)

Filippos Mandilaras is a prolific and well-known writer of children's illustrated books and of young adults' novels. Mandilaras studied French Literature in Sorbonne, Paris. His latest novel, which was published in May 2016, is entitled *Υπέροχος Κόσμος* [Wonderful World], and it recounts the story of teenage life in a deprived Athenian district. With his illustrated books, Mandilaras aims to encourage parents and teachers to improvise by adding words when reading stories to children. Mandilaras is interested in the anthropology of extraordinary

creatures and his forthcoming work is about Modern Greek Mythologies.

### Additional information

#### Summary

The book starts by showing two gods as small children in a pram. We read that the boy grew up to become a patron of the arts and music, while the girl lived in the forests and hunted. Readers are asked to guess the two siblings' names. Next, we read about pregnant Leto trying to find a place to give birth, running away from Hera's frustration with Zeus' infidelity.

Leto takes refuge in a small island, and gives birth, first to Artemis and then to Apollo. It now becomes clear to readers who the small children are, and that they are twins. Hera sends a dragon, Python, to fight Leto and her children. Apollo chases Python, finds his hiding cave at Delphi, and kills him with his arrows. At the Delphic Oracle, Apollo learned about divination from the Pythia. At the same time, Artemis wandered around the forests, hunting wild beasts. Apollo and Artemis joined forces to kill the giant Tityos with their arrows.

We then read that Zeus was very happy to see Artemis, his daughter, and promised to fulfil all her wishes. Artemis wanted to stay unmarried and live as a huntress. And this was granted. Artemis lived in the forests, in the company of deer. Apollo, on the other hand, became a god of music, light, the arts, and divination, and he lived in the skies. Apollo had many adventures. He chased Daphne, but she turned herself into a plant. He was good friends with Hyacinth. Zephyros was envious of the friendship, and killed Hyacinth with a discus. Apollo turned his friend's blood into flowers. Apollo loved Cassandra, the princess of Troy, but she rejected him. Apollo cursed her to foresee the future.

We read that Artemis had adventures also. When Aktaeon saw her bathing, she turned him into a deer. Orion boasted that he was a better hunter than Artemis, and she killed him. Artemis, nonetheless, was also compassionate, and saved Iphigeneia from being sacrificed.

The narrative ends with a depiction of modern tourists visiting ancient ruins. Visitors to Brauron and Delphi may think that the two gods still live there. The book closes by offering background information about Apollo, Artemis, and Delphi, as well as an exercise wherein children are asked to associate things and animals with either Apollo or Artemis.

## Analysis

In a concise manner, the book covers Apollo's and Artemis' roles within the Greek pantheon, multiple mythological episodes, and the gods' key attributes, the lyra and the deer, respectively. There is considerable emphasis on family ties, which presumably helps with children's learning of stories and names from the distant past. Leto cares for her children. The twins assist and complement each other. Zeus dearly loves his daughter whom, as we read, he hugs, takes on his lap, and fills with kisses. The portrayal of the latter appears to have potent connotations for a western, and possibly feminist, upbringing. Artemis, although a young child judging from her small size in the illustration, stands with confidence before her father and articulates a long list of demands. She is someone who knows what she wants. She makes a point about wishing to be unconventional, to live in the mountains, and not to marry.

Appropriately, natural landscapes and greenery dominate in the illustrations. Green is a colour that is almost unknown in Greek art, given its limited presence, if any, on artefacts that range from Mycenaean frescoes (ca. 1500-1200 BCE) to Attic white polychrome *lekythoi* (5<sup>th</sup> century BCE). In the book, green defines the forests of huntress Artemis, but also the plains where the killings of Python and Tityos take place. The protagonists appear to act in an undomesticated context that has almost nothing to do with the world of mortals. We read, moreover, that Apollo could fly in the sky and be close to anyone that needed him. Artemis is shown flying, as she carries Iphigeneia away from Aulis. Open spaces appear to grant the two deities freedom, as well as high mobility in ways that humans could not have.

There are elements in the textual and pictorial narrative that align the content of the book here with modern visual media. The green dragon may remind readers of dinosaurs. More impressively perhaps, the dragon could call to mind folk tales wherein dragons, like Python at Delphi, guard water sources. Leto, Apollo, and Artemis are all shown with blond hair, and this may resonate with contemporary ideas of beauty, especially in Hollywood movies.

It may become questionable, then, whether Apollo and Artemis are represented as deities. The religious significance of Delos and Delphi seem to be downplayed in the book. Delos is not described as a cult place, as confirmed archaeologically. It is only at the last page that we read that Apollo and Artemis were venerated in temples in ancient

Greece. Throughout the book, Apollo and Artemis stage a performance, first as children and then as young adults (who never grow old). They are constantly on the move, and have adventurous encounters with significant others, often with a sad ending as highlighted by Hyacinth's death. Their fate, therefore, is marked also with misfortune, and in these respects mirrors the lives of mortals. Classical myth has been sanitized for children. While sexuality has been removed, violence and death remain. Sad events may aim to help children to develop coping mechanisms.
