Translation English: *The Iliad - Homer for Fun*, trans. Lesley Burgon, Federighi, 2014, 47 pp.

Summary

As is it noted on the book's cover, "this series of abridged books certainly doesn't intend to replace the originals of the classics they represent, but rather aims to render them accessible and attractive for young people (and... also not-so-young)". This is a perfect summary of the series, which incorporates the mythical stories with the help of visually attractive and highly colorful illustrations on each page; the text is written on top of these paintings which cover the entire page.

This story emphasizes highlights of the Trojan War and narrates the story from the beginning to the end of Troy in a short span of 48 pages. Regardless of the brevity, the book provides a full description of the War and the main points of it, including the intervention of the gods.

The retelling of the Iliad contains the narratives of the golden apple, participation of the gods, the wrath of Achilles, the death of Patroclus and Hector and the wooden horse. Some of these stories did not appear in the Homeric poem, yet since they were part of the Trojan cycle the author decided to include them in order to present a more complete portrayal of the story to young readers.

The author chooses to highlight specific scenes from the narrative, such as Achilles' appeal to his mother (although his choice of short life is not mentioned); Aphrodite's rescue of Paris; and Poseidon's assistance to the Achaeans. It is even mentioned how Apollo struck Patroclus himself and how Patroclus' spirit revealed itself to Achilles. Unlike many retelling of the Trojan War, the involvement of the gods is highly accentuated in this narrative and add elements of fantasy to the story that the young readers may appreciate and be interested in. The main characters appears at the beginning (a small picture and a short description of each), Greeks, Trojans and Gods. On the back cover there is a note from the editors, stating that they have paid special attention to the visual images, after having carried out research into costumes and settings. The result is an attractive looking book.

Analysis

The book is named "Homer for Fun" and while it is hard to refer to the Trojan War as "fun" the book does offer an enjoyable reading, mainly because of the attractive and colorful illustrations which spread on full pages and form an integral part of the narrative.

The book refers to Homer as the main point of reference, yet also relates events that are not in the *Iliad*, yet can be found in the *Odyssey* or *Aeneid*, such as the feud between the goddesses, the wooden horse, Achilles' death and Helen's return to Greece. For some reason, only Odysseus is referred to by his Roman name, Ulysses. The reason may be that his Roman name is more familiar to the Italian children. The author also uses the words 'Achaean' to refer to the Greeks, followed by the word Greeks in parentheses, thus maintaining the archaic feeling of the war.

There is almost no characterization of Helen, the actual cause of the war. Paris decides to kidnap her because Aphrodite offered her to him (and Menelaus waged war take her back. There is a large picture of Helen and Paris holding hands and looking lovingly at each other, and at the end she is shown from behind, looking at the blazing Troy. Helen's thoughts or action are not referred to in the book, as if she was indeed a prize to be won. It seems that the author wished to present only a general description of the story, without delving deeper into a more detailed characteristic of different characters. The other characters are also not deeply developed. Achilles is mainly presented as angry and, surprisingly, Hector is presented as rather cruel. There is no tender scene between him and his family. Thus the story depicts only a stereotypical imagery of them.

Colour is also utilized effectively in the illustrations, both to convey the feelings of the characters and to reflect the mood of the narrative. For example, fighting scenes are presented on a yellowish background perhaps to elude to the setting of the battles on the sand; when Achilles hears about Patroclus' death, the pages are red, symbolizing his anger; Thetis appears on blue background, symbolizing her status as sea nymph. Thus the visual language is just as important as the actual words and plays an equal part in conveying the story. This helps young readers to understand the story even if they are not fluent in reading the text.
