Summary	In Gotham (a fictional city in the DC universe) Batman (alter ego of Bruce Wayne) fights with a flying creature, who dies revealing a pattern on a wall featuring three boxes. Looking for another Metahuman, Aquaman, in a remote village, Bruce Wayne sees the same three boxes on an ancient drawing on a wall. Aquaman refuses to join him. On the Amazon island of Themyscira a box opens and a large powerful being, Steppenwolf, appears. Flying creatures follow him and attack the Amazons who are led by Hippolyta. The Amazons try to protect the box, but the Steppenwolf takes it. Hippolyta has an Amazon warning fire lit, so that Amazon Princess Diana, who now lives as Diana Prince/Wonder Woman in the world beyond Themyscira, will be aware of the threat. Diana goes to Bruce Wayne to help him form his army and tells him about Steppenwolf, ‘the end of worlds’ who ‘lived only to conquer’. The flying creatures are parademons, formed from the victims he has killed. She advises Wayne that two more ‘mother boxes’ exist, one protected by men and one by the Atlanteans. If they are brought together they will combine to form ‘the Unity’ and can
---------	---

transform the earth into Steppenwolf's hell world. It transpires that Steppenwolf has returned and the boxes are activated because Superman has died.

Diana/Wonder Woman agrees to recruit Cyborg/Victor Stone. Initially he refuses to help but quickly joins the team. Bruce Wayne recruits the Flash/Barry Allen. Once the Atlantean box is stolen by Steppenwolf Aquaman/Arthur Curry also joins. Steppenwolf kidnaps people who he thinks can help him find the last mother box, including Victor's father, who has the mother box which he calls the change engine. He had used the box to create Cyborg after Victor was in an accident. When the team find Steppenwolf they fight him and save the hostages, and Cyborg retrieves the mother box from his father's lab. Bruce Wayne wants to use the power of the mother box and the Kryptonian chamber previously used by Lex Luthor, the villain from *Batman v Superman: The Dawn of Justice* (2016), to create Doomsday to bring Superman (alter ego of Clark Kent) back from the dead, as 'the world needs Superman and the team needs Clark'. Clark Kent is exhumed and his body taken to the Kryptonian Chamber with the mother box. Superman comes back but initially fights the team. He is about to kill Batman when Alfred brings Lois Lane (girlfriend of Clark Kent). Clark takes her to the Kent farm, the home of Clark Kent's mother, Martha. Steppenwolf takes the mother box.

The team fight the parademons and Steppenwolf and Cyborg tries to reprogram the mother boxes. The hell world creation starts to happen in Russia. The team are struggling until Superman arrives to fight Steppenwolf, and to help the Flash save civilians. Cyborg reprograms the mother boxes, and the parademons surround the failed Steppenwolf and destroy him.

At the end of the film, Bruce Wayne buys the bank which is foreclosing on the Kent farm. The superheroes are seen separately in costume in their own elements, voiced over by Lois Lane, who is writing a story about the heroes.

Analysis

Justice League (2017) was released after *Wonder Woman* (2017), a film in the same series featuring superheroes from the DC Universe, and which includes a short scene at the beginning of the film on Themyscira, the Amazon's island home. As in *Wonder Woman* (2017) younger viewers, and particularly young female viewers, might be

expected to admire these strong female character noted for their fighting and riding skills. However, the Amazons in *Justice League* are more skimpily dressed than in *Wonder Woman*, and Wonder Woman's own superhero outfit skirt is shorter too.

The costume designer, Michael Wilkinson, argued that as the film is set in the present day, rather than the World War One era of the first film (for which the costume designer was Lindy Hemming), there has been 'a slight development in their armor' ([screenrant.com](https://www.screenrant.com), accessed: September 9, 2019). The new 'armour,' often revealing bare midriffs does show off the athletic physique of the actresses, who according to Wilkinson went through intense physical training for the film, however some viewers may think the costumes are made unnecessarily revealing, when these characters are otherwise role models for young female viewers.

As in *Batman v Superman* (2016) Diana Prince/Wonder Woman is associated with classical myth (and shares her name with a Roman goddess, Diana). Her lasso that compels people to tell the truth is called 'the lasso of Hestia', but no further information about Hestia is provided. Hestia is not one of the most well-known goddesses, and so young -or older - viewers would not be expected to have heard of her before. The lasso first appears in *Sensation Comics #6* (1942) created by Hippolyta from Aphrodite's girdle, which causes anyone bound by it to obey Diana. It is called the 'lasso of truth' in *Wonder Woman #2* (1987) written by George Perez, and is more often referred to in this way (see Bergstrom, 2017)

Diana is seen at work cleaning what appears to be oversized classical statue of a goddess, while undertaking her role as museum creator at the Louvre in Paris. At the end of the film Wonder Woman has apprehended thieves outside another museum, the British Museum in London, and is in costume in public talking to children, something she has not done before, as she has preferred to keep her identity secret. A goddess figure with arms crossed like Wonder Woman is shown on a poster outside the museum and Wonder Woman puts a small version of this statue into a crate. Diana as Wonder Woman can therefore be seen as a goddess herself. She has the super strength of a deity, and at the end of *Wonder Woman* (2017), Ares had told Wonder Woman that she is the daughter of Zeus and Hippolyta, and was not created of clay given life by Zeus as her mother had told her (although Ares is an unreliable character and so this might not be true). If we do see Wonder Woman as a goddess then she is a benign deity, using her

powers for good in direct contrast with Steppenwolf. Situating her with children at the end of the episode also highlights the role she has taken within the human world, that of protector of the innocent. She has now fully accepted her role as a superhero and force for good.

Information linked with classical myth that drives the plot, rather than being incidental, concerns the history of Steppenwolf. Diana relates information about Steppenwolf and the mother boxes to Bruce by way of a flash back, as she voices over that 'one mother box was guarded by the Amazons, one by the Atlanteans, and one by man. It was truly an age of heroes'. Diana tells Bruce that aliens and the gods also joined with the heroes to fight Steppenwolf, and the gods that we briefly see include an archer goddess who could be Artemis and a god throwing thunderbolts who could be Zeus. The ancient Greek gods are included here, together with the ancient races of Amazons, Atlanteans and humans, to indicate that Steppenwolf existed in ancient times on earth. The idea of the age of heroes also invokes Hesiod's Ages of Man (Hesiod, *Works and Days*, 109-201), but this is an age that has past, and so the names of the gods are perhaps no longer relevant: the Greek gods are now dead, but Steppenwolf, the Amazons and the Atlanteans remain. The gods, and particularly Zeus, are linked with Diana's heritage as an Amazon, as we learn from Queen Hippolyta in *Wonder Woman* (2017) that the dying Zeus created the island of the Amazons. By building the Greek gods into the story of Steppenwolf, a modern fictional villain from the DC universe, viewers are encouraged to see Steppenwolf as a being with god-like powers who has taken a different path from the superheroes, who also possess powers
