Creators

Bob Baker , b. 1939 (Scriptwriter)

Bob Baker (1939) is a highly-regarded TV and feature-film scriptwriter for the British market. As well as writing a number of stories and serials for *Doctor Who* (between 1971 and 1979) – in which capacity he collaborated with Dave Martin – he also co-wrote the *Wallace and Gromit* films with the characters' chief creator, Nick Park: *The Wrong Trousers* (1993), *A Close Shave* (1995), *Curse of the Were-Rabbit* (2005), and *A Matter of Loaf and Death* (2008). Baker and Martin invented the Doctor's robotic dog K-9 (from 1977), and several of the series' other iconic characters. Beyond *Doctor Who*, Baker collaborated with Martin on the children's TV show *Sky* (1975) and *Into the Labyrinth* (1981–1982), as well as scripts for *Shoestring* (1979) and *Bergerac* (1981 & 1983). A K-9-themed TV series aired between 2009 and 2010, buoyed by the successful revival of *Doctor Who* from 2005; and co-wrote his autobiography – *K-9 Stole My Trousers* (2013) – with Laurie Booth. Yet another K-9-themed project – *The Essential Book of K-9* (2015) – is his most recent work to-date.

Dave Martin , 1935 - 2007 (Author, Scriptwriter)

Dave Martin (1935–2007) was a British TV and film writer who, notably, collaborated with Bob Baker during the 1970s on numerous *Doctor Who* serials (1971–1979). Martin and Baker invented the Doctor's robotic dog K-9 (from 1977), and several of the series' other iconic characters. Beyond *Doctor Who*, Martin collaborated with Baker on the children's TV show *Sky* (1975) *Into the Labyrinth* (1981–1982), as well as scripts for *Shoestring* (1979) and *Bergerac* (1981 & 1983). A *Make*

Your Own Adventure book of *Doctor Who* – *Search for the Doctor* (1986) – also appeared under Martin's name. He was diagnosed with lung cancer in 2007, and passed-away within months.

Anthony Read , 1935 - 2015 **(Author, Scriptwriter)**

Anthony Read (1935-2015) was an English TV writer and script editor, who also wrote prose fiction – based on his 1983 TV series *The Baker Street Boys* (2005-2012) – and a number of popular history works (largely focused on aspects of the Second World War). Read's first TV credits were for the series *Detective* (1964), *The Indian Tales of Rudyard Kipling* (1964) and *Sherlock Holmes* (1965) for BBC1. Other works ranged from adventure stories (*The Black Arrow*, 1974-5), courtroom drama (*Sutherland's Law*, 1974), and crime thrillers (*The Professionals*, 1977-1980). Under a pseudonym, and while acting as Script Editor for the series, he wrote *The Invasion of Time* (1978) for *Doctor Who*. He oversaw the remainder of the 1977-78 and 1978-79 series, and was then instrumental in having Douglas Adams appointed as his successor for the 1979-80 series. He was then invited back to pen *The Horns of Nimon* (1979), which treated the labyrinth/Minotaur myth in similar style to *Underworld* (1978). With Bob Baker and Dave Martin, he contributed to the series *Into the Labyrinth* (1981), before perhaps his highest-regarded work: an adaptation of the Sherlock Holmes oeuvre, *The Baker Street Boys* (1983). Further iconic sci-fi work came in the *Chocky* series – *Chocky* (1984); *Chocky's Children* (1985); and *Chocky's Challenge* (1986) – as well as scripts for *Heartbeat* (1998) and his final credits came on *Revelations* (2002-3). A member of the Writers' Guild of Great Britain (and chairman, 1981-2), he was a strong mentor for many younger writers.

Summary	‘Underworld’ was typical of mid-1970s <i>Doctor Who</i> (1963–1989; 2005–present), in what is still regarded as its most successful period. Scripts in the era of the Fourth Doctor (played by Tom Baker) – with his

enormous, multi-coloured scarf, and the ability to switch between high comedy and serious drama – delved regularly into mythological, historical, and literary themes that were already well-known to the family audiences. These were often transposed from their original, Earth-bound settings, to science-fiction contexts. While primarily a space-age retelling of the Jason and the Argonauts myth, the setting of ‘Underworld’ is also a labyrinthine maze, and the race of people encountered by the Doctor and his companions, Leela and K-9, are called ‘Minyans’ (a direct reference to the Minoans). The names of the main characters are corruptions of Ancient Greek originals, from various contexts (Jackson = Jason; Herrick =- Herakles; Orfe = Orpheus, and so on...). The quest that forms the main narrative of the serial, is that to locate (deep in the ‘Underworld’ of the title), the ‘P7E’ (Persephone): a lost starship that contained all the genetic ‘race banks’ of the Minyan species. There is also a deliberate engagement with the Orpheus myth, and the conflict between mortals and the gods: many centuries earlier, the Minyans encountered the Doctor’s own race – the godlike Time Lords – and worshipped them as deities. The Minyans acquired higher technologies from the Time Lords (including the near-immortality bestowed by the ability to ‘regenerate’ at the point of death), but their society was riven by war and conflict as a result. Slavery is also featured, as the subjects of the Oracle at the centre of the P7E (around which a small planetoid has formed over the millennia, turning the ship into a literal ‘Underworld’), are all compelled to work to provide sustenance and resources in a command economy.

Analysis

‘Underworld is a key example of mid-1970s British TV entertainment. The episodes of *Doctor Who* featuring the Fourth Doctor (played by Tom Baker) – with his enormous, multi-coloured scarf, and the ability to switch between high comedy and serious drama – garnered huge audiences, both in Britain and worldwide (notably in the United States and the British Commonwealth contexts). Between 8.9 and 11.7 million viewers (in Britain) watched the ‘Underworld’ episodes when first broadcast. The time-and-space travelling theme of the program was a handy device for justifying the incursion into an interstellar reimagining of mythical contexts; and the Doctor and his companions serve as useful avatars for the young audience-members as they are introduced to and familiarised with the mythical context of the storyline (or, rather, reacquainted with matters with which they may have been familiar; with such themes only slowly being phased-out of British

elementary-level schooling in the 1970s). Such themes were also familiar to audiences acquainted with Ray Harryhausen's *Jason and the Argonauts* (1963) – a significant stop-motion fantasy film co-produced by British and the American partners, which saw multiple re-screenings throughout the 1960s and '70s.
